

# عناوین کتب خریداری و کپی شده در اردیبهشت

۱۳۹۶

- Lectures in Meteorology
- Quantitative Remote Sensing in Thermal Infrared
- Remote Sensing of Hydrological Extremes
- Hot Spots” in the Climate System
- Principles of Applied remote sensing
- An Introduction to Lightning
- Active Faults of the World
- Basic Earthquake Engineering
- Deep Earthquakes
- Earthquake data in Nginering Seismology
- Earthquake Seismology
- Intraolate Earthquakes
- Perspectives on European Earthquake Engineering and Seismology v.1, v.2
- Source Mechanisms of Earthquakes
- Treatise on Geophysics
- Monte-Carlo Simulation-Based Statistical Modeling
- Multivariate Wavelet Frames

- **Partial Differential Equations: Modeling, Analysis and Numerical Approximation**
- **Earthquakes and Their Impact on Society**
- **Introduction to Time Series and Forecasting**
- **Numerical Approximation of Partial Differential Equations**
- **Programming for Computations – Python**
- **Chaos: Concepts, Control and Constructive Use**
- **Current challenges in statistical seismology**
- **Applied stochastic processes**
- **Calculus and Differential Equations with mathematica**
- **Calculus and differential equations with Matlab**
- **Computational physics**
- **Cameron the physics of the manhattan project 2**
- **recent advances in nuclear explosion monitoring V.2**
- **Engineering geology**
- **Grounwater resources and management**
- **Structural geology and tectonics**
- **Electromagnetic theory ( book with DVD)**
- **Electromagnetism : illustrated handbook**
- **Handbook of fourier analysis and wavelets :analysis and applications**
- **Problems in electricity and magnetism**
- **Spectral analysis of signals**
